Title: Tales from the Maze

Artist: Maze of Time

Release: 30 October, 2006

Suggested Retail: \$22

Inspiration

Comes from the early 70-ies, with noteworthy progressive bands like Yes, King Crimson and Genesis. But there is also a darker, more intricate side, brandishing heavier guitars and noisier drum kits; with sounds from Deep Purple, Rainbow, Ozzy and many more.

Biography

In 2002, composer and lyricist Robert I Edman gathered his old friends from the past, bass virtuoso Janne Persson and talented symphonic rock drummer Thomas Nordh, to investigate a series of newly-written songs, which were forged into new shapes through countless free-form sessions. In parallel, Robert produced a fair number of home studio recordings, but felt the music deserved to be played live, with real people playing real instruments. In the search for additional fellow musicians loony enough to join him to a local studio, and to the journey beyond, the trio was extended with long-time friend and vocalist Christer Lindström and childhood buddy Alex Jonsson, known for tormenting various keyboards and woodwinds. Maze of Time was born, and the journey began.

The band members are ever since attracted to the warmth of analogue instruments and studio equipment, preferring vintage gear to new electronics and collaborate closely with an infamous old-school recording studio named Over the Hill.

What others say

"It's rare when you discover a new band that has all of the musical and instrumental qualities you are always looking for, and one of that is Maze Of Time, a band with a large musical spectrum and an even larger sound"

Maze of time; Album of the month, January 2007

Progressive Rock BR

"It is simply great, that new band like MAZE OF TIME can sometimes appear - seemingly from nowhere, to brighten up your day."

Sergio Vilar, **NucleusProg.com**

"Maze of Time is a symphonic neo-progressive rock band from Sweden. "Tales from the Maze" is a wonderful debut album with strong melodies, good lyrics, and it has all the references to the past that makes this a great neo-prog album. At the same time the band manages to sound really fresh and unique. "

Svend Olaf Olsen, **Ectagon**

"Listening to the album "Tales From The Maze" recalls peeling onions. But not because it is the act of generating tears, but that at each subsequent layer you find something new and discover what at the previous hearing just couldn't be revealed"

Artur Chachlowski, **Metal Hammer (PL)**
